INVESTMENT BREAKTHROUGH TO ACHIEVE RENEWABLE ENERGY TARGET

29 - 31 August 2018 - Balai Kartini, Jakarta

Organized by:

FOREWORD CHAIRMAN OF METI

Known as the Emerald on the Equator, Indonesia is blessed with abundant energy resources. Our country has enormous potentials in renewable energy development to sustain National Energy Resilience. Accordingly, Indonesia has been encouraged to focus on renewable energy sources and reinforce the usage of clean energy. Renewable energy has been greatly developed in recent years, thus lowering the overall generation cost, increasing popularity, and improving efficiency.

Advances in renewable energy technology provides better opportunities for Indonesia to develop its abundant resources. It requires an integrated strategy to promote the use of renewable energy and empower local resources which are plentiful on a large scale.

As part of our continuous effort to work out and disseminate policies and programs initiated by the Directorate General of EBTKE - Ministry of Energy and Mineral Resources, in partnership with the Indonesian Renewable Energy Society (METI) and involving all stakeholders in the field of renewable and clean energy, we proudly present the 7th IndoEBTKE ConEx 2018 on 29 - 31 August 2018 at Balai Kartini, Jakarta.

The 7th IndoEBTKE ConEx 2018 incorporates conference, exhibition, poster and paper presentation, as well as training programs in one place. With this year's theme, "**Investment Breakthrough to Achieve Renewable Energy Target**", the event is regarded as one of the biggest events to exchange information and knowledge on strategic policy and to find a solution to the energy problems, as well as to display technologies, programs and services amongst stakeholders from public and private companies as well as academicians.

This occasion also aims to show how Indonesians have soundly prepared to support the development of energy conservation, renewable and clean energy as well as a platform for building professional relationships with experts within the industry worldwide.

We look forward to welcoming your attendance and participation at the 7th IndoEBTKE ConEx 2018. We hope that your presence at the conference and exhibition will contribute to developing knowledge and business opportunities in the field of Renewable and Clean Energy.

Sincerely,

Surya Darma
Chairman of IRES/METI

ABOUT INDOEBTKE CONEX

The 7th IndoEBTKE ConEx 2018, is the biggest and renowned new and renewable energy event in Indonesia, organized by the Indonesian Renewable Energy Society and officially endorsed by the Government of the Republic of Indonesia – Directorate General of New Energy, Renewable and Energy Conservation - Ministry of Energy and Mineral Resources. This 3-day event, held on 29 - 31 August 2018 at Balai Kartini - Jakarta, Indonesia, boasts several programs series such as conference, exhibition, poster and paper competition, training and student visit. This event will gather prominent stakeholders from government officials, professionals, lecturers, college students, as well as non-governmental organization representatives.

In the conference program, various speakers from decision makers, academicians, business leaders, and overseas institutions will bring you the most updated information, comprehensive discussion, and advanced development within the industry to overcome renewable energy challenges in Indonesia.

With this year's theme, **"Investment Breakthrough to Achieve Renewable Energy Target"**, this event will feature topics, challenges, issues, products, technologies, and business opportunities in renewable energy and energy conservation development in Indonesia.

MAIN PROGRAMS:

- 1. Conference :**
The conference is the best platform to get you the in-depth knowledge, to share and discuss advances and developments with the Renewable Energy and Clean Energy think tanks and key players
- 2. Exhibition :**
The exhibition is the best platform for showcasing and demonstrating the latest technologies, innovations, and programs of Renewable Energy and Clean Energy.
- 3. Training :**
The training program is designed to share the updates and advances of the Renewable Energy and Clean Energy Industry to the key players and academicians. It is supported by Non-governmental organizations as well as related institutions.
- 4. Paper & Poster Competition :**
The 7th IndoEBTKE ConEx 2018 invites practitioners, student and lecture to present your best paper and poster at The 7th IndoEBTKE ConEx 2018

Supporting Programs:

Event Visit for High Schoolers
The event visit high schoolers is a big opportunity to broaden their knowledge of new energy, Renewable Energy, and Clean Energy in Indonesia. The high schoolers get the chance to have an option and beneficial network for their future carrier. Moreover, they can be the young agent to help developing the sustainability and efficiency of clean energy in Indonesia.

Why Should Participate

- 1. Access to Renewables Industry in Region**
Enjoy access to colleagues and leaders from every facet of industry access
- 2. Partnership and Networking**
Meet and expand your peer network with all your partners in just three days and explore new partnership opportunities with institutional decision makers and influencers
- 3. Learning from the best**
Discover best practices, data-driven insights, and trends that will make you a stronger professional and give your institution a competitive advantage in an increasingly globalized world
- 4. Meet the experts**
Benefit from the expertise of some of the Indonesia leading experts and gain knowledge, ideas, and strategic insights.

FOREWORD CHAIRMAN OF THE 7th INDONESIA EBTKE ConEx 2018

The dependency on high carbon emission fuels, such as oil and coal, in fulfilling Indonesia's energy consumption is still high. Moreover, due to the declining reserves, on top of the domestic production, Indonesia has to import crude oil and finished products up to 50% of the daily requirement. Such a situation puts the National Energy Resilience in high risk.

Quoting from the President of the Republic of Indonesia's speech during the Paris COP 21, the Government of Indonesia has committed to lower the environmental impact due to carbon emission and to reinforce the development of locally available renewable resources to meet energy sustainability. This commitment requires concrete action by every stakeholder in the country.

As a consequence, accelerating the development of renewable and clean energy is currently considered as one of the critical strategies for Indonesia to deliver its commitment to the global community. Every obstacle and barrier needs to be resolved in an utmost appropriate approach. In order to show our continuous effort in promoting renewable energy, we collaborate with related parties to once again present the 7th IndoEBTKE ConEx 2018 on 29 - 31 August 2018 at Balai Kartini, Jakarta, Indonesia.

The 7th IndoEBTKE ConEx 2018 is an annual conference and exhibition of renewable energy and conservation of energy (EBTKE) in Indonesia jointly organized by the Directorate General of EBTKE and The Indonesian Renewable Energy Society (METI). The theme of this year's event is **"Investment Breakthrough to Achieve Renewable Energy Target"**.

This event is highly acclaimed as an annual forum of its kind in Indonesia to bring together every relevant stakeholder not only from government officials, but also from industries, business sectors, universities, researchers, mass media, Non-Governmental Organizations and the public to share their experiences, knowledge and best practices, as well as to showcase the latest products and services in renewable energy and clean energy industry.

Through the 7th IndoEBTKE ConEx 2018, we hope that everyone can take benefit from sharing experiences and knowledge on how to overcome the challenges, take opportunities, build professional relationship, strengthen cooperation amongst related parties, as well as to synergize the programs in delivering clean energy whilst sustaining energy resilience for the nation.

Allow me to take this opportunity to express my highest appreciation and gratitude to the speakers, sponsors, exhibitors, and all of the 7th IndoEBTKE ConEx 2018 committees and event organizer for their hard work and contribution to make this conference a great success. I also hope that you will find this conference and exhibition valuable and are able to make a significant improvement in enabling the development of renewable energy in Indonesia. I am looking forward to welcoming your participation in the 7th Indo EBTKE ConEx 2018.

Best Regards,

Herutama Trikoranto

Chairman of The 7th Indonesia EBTKE ConEx 2018
